

**Leading Edge Open Source EMR for Family
Physicians, Family Practices and
Family Health Teams**

**Enabling the highest quality of patient care with
innovative IT, academic and research tools**

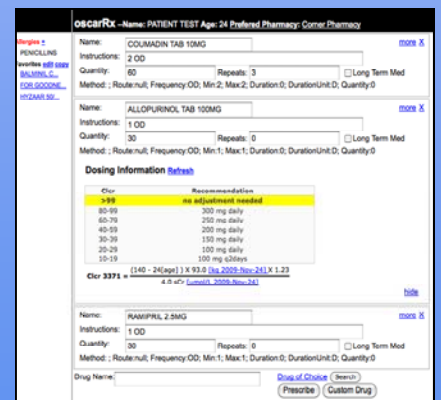

OSCAR EMR Features

- ◆ Scheduling of patient visits with highly customized views for provider groups and individualized booking preferences.

- ◆ Complete e-Charting of patient encounters with a Cumulative Patient Profile (CPP), providing a “snapshot view” of important demographics, all active medical problems, medications, allergies, significant past history, family history and social history.

- ◆ Prescription module with drug-drug interactions and renal dosage adjustments.
- ◆ A sophisticated antenatal care record with antenatal care planner.
- ◆ Disease Registry provided to support population health analysis.

About OSCAR

OSCAR is a comprehensive, web-based, open source Electronic Medical Record (EMR) which be easily adapted to the changing health care environment. It is highly customizable to accommodate a wide variety of clinical, research, education and language needs. This award winning system has passed CMS Conformance Testing 3.0 with OntarioMD and is HL7 compliant.

Currently there are approximately 450 OSCAR users in Ontario and over 700 across Canada, translating to more than a million patient records on the system.

OSCAR has no licensing fees and a lower overall cost of ownership, making it the most affordable full service EMR solution for all sizes of physician practices both in hospitals and in the community.

OSCAR is used by family physicians, maternity centers, ophthalmologists, obstetricians and gynecologists, pediatricians, internal medicine practitioners, general and orthopedic surgeons, dermatologists, and fertility clinics.
